

Liveable Housing Design

In 2022 the NCC Vol 2 will introduce a new Liveable Housing Design requirement for all class 1a buildings.

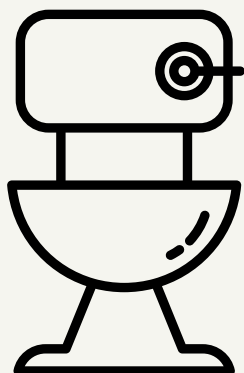

Path of Travel

A safe continuous, step free path of travel to the dwelling will be required from either the pedestrian entry at the boundary or an attached garage or carport or a car parking space provided for the exclusive use of the occupants of the dwelling.

Doors

At least one level and step-free entrance door is to be provided from the access path and internal doors and corridors which facilitate unimpeded movement between spaces.

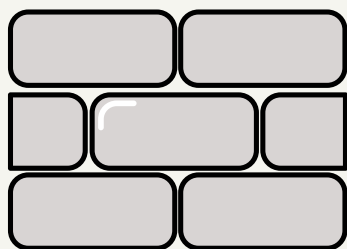

Sanitary Compartment

A sanitary compartment is to be provided that will facilitate independent access and use and is located on the ground or entry level.

Shower

A shower is to be provided that will facilitate independent access and use and is located on the ground or entry level.

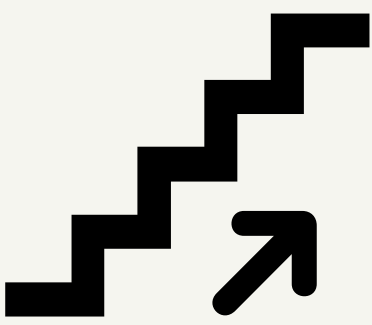

Walls

The walls of the Sanitary compartment and shower referred to above are to be constructed so as to facilitate future installation of grab rails, or the like, in a way that minimises the removal of existing wall linings.

Additional information will be provided as it becomes available

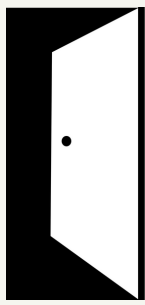

EXEMPTIONS

In 2022 the NCC Vol 2 will introduce a new Liveable Housing Design requirement for all class 1a buildings.

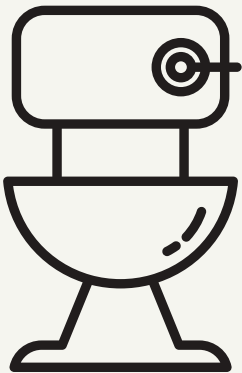

Path of Travel

A safe continuous, step free path of travel to the dwelling will be required from either the pedestrian entry at the boundary or an attached garage or carport or a car parking space provided for the exclusive use of the occupants of the dwelling.

Doors

At least one level and step-free entrance door is to be provided from the access path and internal doors and corridors which facilitate unimpeded movement between spaces.

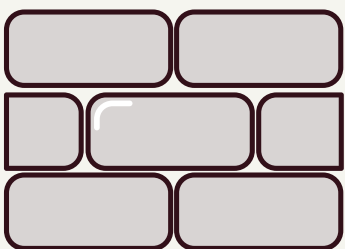

Sanitary Compartment

A sanitary compartment is to be provided that will facilitate independent access and use and is located on the ground or entry level.
